# FUR SAMPLE COLLECTION

## INSTRUCTIONS

Our testing machines require only a small fur sample, five or six hair strands of any length.

If possible, please send hair from your pet's brush or comb (as this will contain the root bulb), however if your pet does not shed hair a cut sample is fine.

Please be very careful and only cut a tiny section of fur from your pet. Do not pull hair as this can be very painful.

### **PLEASE DO NOT SEND YOUR PET'S URINE OR FAECES**

Place the hair sample in a small sealable bag with your pet's name and order number (found on your order confirmation email) clearly. If you cannot locate this email, please check junk/spam folders.

Send your pet's hair sample and completed test submission form in a secure envelope, ensuring the correct postage is covered to:

Health Diagnostics Lab  
895 Don Mills Road  
Two Morneau Shepell Centre, Suite 900  
Toronto  
Ontario  
M3C 1W3

Your results are typically emailed within 72 business hours of receiving your hair sample/s.

Please allow realistic timings for your pet's hair sample to be delivered.

## QUESTIONS?

If you require further explanation of the instructions, please do not hesitate to contact us.
